

INCEPTION- Call for Interdisciplinary Research Projects

(INstitut Convergence: Emergence of Pathology Through Individuals and PopulatiONs) The INCEPTION program, supported by the call Institut Convergence des Investissements d'Avenir, is launching a call for collaborative, transversal and interdisciplinary projects aimed at understanding the emergence of pathologies through individuals and populations.

FUNDING

250k € maximum for 2 years (human resources/running/equipment).

APPLICATION AND ELIGIBILITY

- Interdisciplinary project on the emergence of pathologies, combining biology, medicine, mathematics, statistics, computer science, physics, social sciences ...
 - The cross-cutting nature must be clearly demonstrated as well as its added value to answer the questions addressed in the project
 - Collaboration between two or more units/ research teams in complementary areas of expertise
 - One of the teams carrying the project must be affiliated with the Institut Pasteur (Paris); The other team (s) must be affiliated to one of the partners of INCEPTION (Institut Pasteur included)
 - Projects may also include the participation of additional, unaffiliated teams in one of the INCEPTION partners. However, the budget allocated by INCEPTION will not cover the expenses of such partners for the implementation of the project.
- The call is open to all Institut Pasteur units/teams and partner institutes.
